

Unit 8 Natural Selection Test – Learning Target Reflection

A. I can identify traits and adaptations that are helpful for successful reproduction (or harmful).

B. I can explain how genes and environmental factors determine the traits and behaviors of organisms.

C. I can describe how the ratio of helpful traits will increase in a population over time.

D. I can explain how homologous structures between species show similarities across all organisms.

E. I can explain how genetic variation can increase survival probability in a species.

Overall Test Score: _____%

Did you get a 70% or higher

☐ Yes, so it is optional for me to retake it

☐ No, so it is NOT optional for me to retake it

3rd Term Reflection

Unit	Passed at 70% or higher?	
	Yes	No
Unit 1: Cells		
Unit 2: Musculoskeletal System		
Unit 3: Cardiovascular System		
Unit 4: Nervous System		
Unit 5: Digestive System		
Midterm Exam		
Unit 6: DNA/Protein Synthesis		
Unit 7: Heredity		
Unit 8: Natural Selection		
Unit 9: Population Dynamics		
Unit 10: Cycles		
Final Exam
