

Types of Speed

1. Constant Speed = stays the same without changing
Ex: Fan, Hair dryer

2. Variable Speed = when an object is changing speed
(acceleration / deceleration)
Ex: Cars driving, throwing a ball through the air

3. Average Speed = an average of speeds over a
given amount of time
Ex: Average speed during a car trip

4. Instantaneous Speed = speed of an object at a
particular time, Snapshot of speed
Ex: Your speed at one point during a car trip
