

The DNA Song

(Crow, row, your boat)

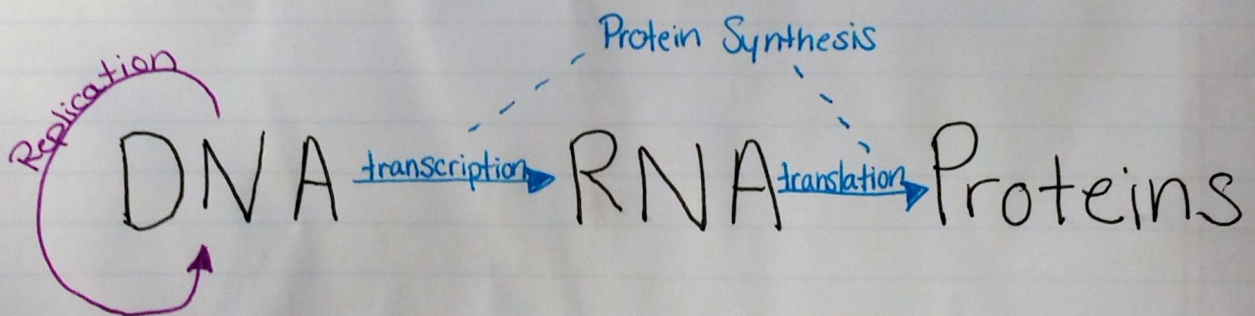

We love DNA

Made out of Nucleotides
Sugar, Phosphate, and a Base
Bonded down one side

Adenine and Thymine make a lovely pair
Cytosine without Guanine would feel very bare

DNA is like the master Instructions or blueprint
for organisms. DNA codes for proteins which
is what we are made out of.

Big Idea

Replication = DNA making an exact copy of itself,
used when making a new cell
