

Unit 10 Population Dynamics Test – Learning Target Reflection

A. I can explain how the availability of resources like food, water, shelter, etc. can impact living things.

B. I can explain how organisms interact with each other including how certain species are vital to the health of their specific ecosystem.

C. I can explain how changes in the environment and human interactions can affect populations of living things.

D. I can discuss the value of maintaining diversity and saving species that are in danger of going extinct.

Student Reflection:

The learning targets I was right on were...

The learning targets I was close on were...

The learning targets I was way off on were...
